

Survey Solutions Scotland Joins Pointools Sales Partner Program in UK

4th August 2011

“High Quality Point Cloud Images of Cambridge University’s ‘Moller Centre’ – Created Using Pointools Software.”

Survey Solutions Scotland, a leading supplier of Trimble and FARO laser scanners, has joined the Pointools Partner Program in the UK. **Pointools** software streamlines scan-to-model workflows by enabling project teams to reference and reuse the largest point cloud models – the billions of measurement points taken by 3D laser scanners – inside the broadest range of applications.

“This is great news for Survey Solutions’ customers who seek best in class hardware and software from a single source,” said Graham Lochhead, Senior Partner at Survey Solutions Scotland.

Pointools offerings include stand-alone applications, CAD software plug-ins, and a third-party technology platform for point cloud processing and visualisation; uniquely enabling point cloud model reuse across Bentley, Autodesk, Safe Software, Rhino, and SketchUp applications without time-consuming translation.

“We are delighted to welcome Graham and his team to our partner program,” enthused Joe Croser, Vice President of Products at Pointools. “As a dealer for Trimble and FARO 3d laser scanners, Survey Solutions Scotland has very deep industry knowledge and is well placed to service the needs of Pointools users in Scotland.”

The **Pointtools** suite of software is used by architects, engineers, contractors and surveyors to leverage the same high-performance Pointtools POD file format across multiple industries and workflows including AEC, Art & Entertainment, Forensics, GIS & Mapping, Heritage, Infrastructure, Manufacturing, Mining, Power & Utilities, and Security & Defence.
